

**Day 15**  
**6/18/13**

Why is the UN concerned about  
Women equality and empowerment?

**Celestial Perspective:**  
God created men and women equal  
need women for Temple marriage  
required for celestial kingdom  
You can take knowledge with you

**US Perspective:**  
it wasn't until rights of women were written  
until they were protected: couldn't vote, limited  
carrers, couldn't own land

**World perspective:**  
They are needed for brighter future  
needed for procreation and care  
for future generation

**Psychological Perspective:**  
raped, excluded from education,  
expected to do chores and raise children only  
some are scared to change  
currently feel less loved and valued  
Some don't have self-worth

**Discipline Perspective:**  
Womens health is most fragile  
they are at more risk during childbirth

**Economic Perspective:**  
if women given the right to be educated and  
work it will help the country to progress faster

not just provide education but help them succeed

**Social Perspective:**  
they bring social abilities that the world  
hasn't has before

**Negative Perspective:**  
emancipating women but infact putting them in danger  
Children will have different perspective of hygiene/life  
Children may get into trouble no mother around to teach

**Modern Perspective:**  
their expectations raise and it raises  
all of societies expectations

**Historical perspective:**  
Have been degraded and not given the same opportunities
